

# PROJECT SEARCH GCCC/SOIN INFORMATION DAY

## PROJECT SEARCH

Is a one year, high school transition program which provides training and education that leads to employment for young adults with disabilities. The goal of the program is competitive employment.

The interns learn employability and life skills in the classroom through the support of a licensed special education teacher. The interns also participate in three, unpaid intern rotations throughout the year with supportive job coaching. These rotations allow the intern to participate in a variety of training experiences within the hospital departments. Project SEARCH is dedicated to workforce development that benefits the individual, community, and workplace. Join US to explore a pathway to success!

**JANUARY 8, 2020 @ 9-10:00 AM**
