Power Equipment Mechanics
Robotics and Automation
Welding and Metal Fabrication

Safety Shoes

All students in career technical programs, which involve the use of heavy equipment or materials, are required to wear industrial safety shoes while in the career technical lab and when doing job assignments outside of the lab. Shoes should be OSHA approved composite or steel toe boots, any color, must meet ANSI Z41-1999. Xenia Shoe and Leather in Xenia offer GCCC discounts on work boots.

Students Who Wear Prescription Eyeglasses

Students in the career technical programs listed above, are required to wear OSHA approved safety glasses meeting ANSI Z87.1. Everyday prescriptions glasses do not meet these standards. Students may wear non-prescription safety glasses over their prescription glasses, or you may choose to purchase OSHA approved ANSI Z87.1 prescription safety glasses at their optician's office. Students in the above career technical programs will receive one pair of free approved safety glasses.

Any questions regarding personal protective equipment, please contact Chasity Love, at 937-372-6941, Ext. 1311.
