Power Equipment Mechanics **
Welding and Metal Fabrication **

Safety Shoes

All students in career technical programs, which involve the use of heavy equipment or materials, are required to wear industrial safety shoes while in the career technical lab and when doing job assignments outside of the lab. All shoes should be leather, thick-soled, lace-up work boots. Cowboy boots and athletic shoes are not acceptable. Xenia Shoe and Leather in Xenia offer GCCC discounts on work boots.

** Please note these career technical labs require **steel-toed** safety shoes.

Students Who Wear Prescription Eyeglasses

Students in the career technical programs listed above, are required to wear Industrial Safety glasses meeting ANSI/OSHA standards. Everyday prescriptions glasses do not meet these standards. Students may wear non-prescription safety glasses over their prescription glasses, or you may choose to purchase ANSI/OSHA approved prescription Industrial Safety Glasses at your optician. Students in the above career technical programs will all receive one pair of free safety glasses.

Any questions regarding students safety, please contact Chasity Love, at 937-372-6941, Ext. 117.
